

Raquel Sánchez Guirado

Work Experience

Accenture - Custom Software Engineering Analyst

April 2026 - Present

- Working at the intersection of software engineering and AI — supporting the design of systems that help engineering teams write better, more consistent code
- Contributing to the knowledge layer and orchestration logic that enables AI models to understand a team's architectural patterns, conventions, and constraints during code generation
- Hands-on with agent architecture, prompt engineering, and skill orchestration; stack includes Claude (Anthropic), GitHub Copilot, Java Spring-Boot ecosystem

New Work SE | Xing - Software Developer

NewWork

June 2025 - January 2026

- Delivered new backend microservice features that unblocked customer adoption of job integration flows.
- Reduced technical debt across multiple services as part of an ongoing cloud migration initiative
- Monitored service health and investigated incidents using Grafana and Datadog; managed Kubernetes-deployed services for scaling and log inspection
- Documented team progress, technical decisions, and achievements; communicated updates to stakeholders across a distributed team

Capgemini - Fullstack Developer & PPO

June 2022 - May 2025

- Developed and maintained enterprise-grade applications including schema migrations with Flyway on PostgreSQL and Oracle databases
- Built and maintained backend microservices using Java 8-17 and Spring Boot; delivered frontend features with Angular
- Participated in Agile/PPO delivery cycles with standard DevOps and CI/CD workflows (Git, Jenkins, Docker)
- Completed an internal Women in Tech bootcamp covering Java, Spring Boot, SQL, Angular, testing, and SCRUM before being onboarded to production teams

Education History

Certificate of Higher Education Cross-Platform Application Development

IES Los Albares (online) September September 2024 - May 2026
Java / Flutter / Firebase/ JavaScript / Python

Bachelor's Degree: English Studies

University of Murcia 2010-2015

Professional summary

Software engineer with 4 years across consulting and product — Java/Spring Boot microservices, full-stack delivery, and currently exploring and designing AI coding agent workflows (Claude, GitHub Copilot). Speaker at T3chfest Madrid 2024. Mentor at [Step4ward](#).

Technical Skills

- **Languages:** Java, Kotlin, Dart, Python, TypeScript, SQL
- **Frameworks & Libraries:** Spring Boot, Flutter, Angular, Maven, Firebase
- **Databases:** PostgreSQL, Oracle, MongoDB, SQLite
- **Infrastructure & DevOps:** Docker, Git/GitHub Actions, CI/CD, Grafana, Datadog
- **Testing:** JUnit 5, Mockito, integration testing, TDD
- **AI:** Prompt engineering, agent architecture, skill orchestration, Claude (Anthropic), GitHub Copilot, Gemini API
